

## KLTF Field Study Research/Course Program

The **Kiyooka Land Trust Foundation (KLTF) Field Study Research/Course Program** is situated on a 72 acre protected wetlands area in Tête Jaune Cache, BC, surrounded by the Monashee, Premier and Rocky Mountain ranges and bordering the Fraser River. Researchers and instructors from western Canada are invited to reside and conduct research and/or offer courses in the Robson Valley, at the KLTF property. Our vision for the Kiyooka Land Trust Research/Course Program is to provide researchers and instructors with space, time and opportunity to do on-the-ground-research at the Kiyooka Land Trust or in the greater Robson Valley and to be inspired by the natural conservation setting.

**Residency Programme since:** [2023](#)

**Working Languages:** [English](#)
